

Answer system solutions

# Steelcase

## Friendly.

Is that really too much to ask from your furniture? We don't think so. That's why we designed Answer with flexible features built-in. Quickly change heights and widths without buying a new panel. Reuse components during changes to save time, money and to minimize waste.

Now isn't that nice?

### Friendly Adaptability.

Answer lets you tailor your workspace to meet any need. Open spaces, adjustability or mobility  
– Answer's adaptability ensures you're ready for whatever changes might be needed.

\*Answer with FrameOne, Moby S and Think.

## Friendly Choices.

Create a look that reflects the unique culture of your organization. Answer supports a huge range of materials including wood, laminate, paint, fabric, glass, ribbed steel, perforated steel, and flat steel.

And if you want even more choices, Answer also accepts custom materials, custom laminates, and PerfectMatch paint.

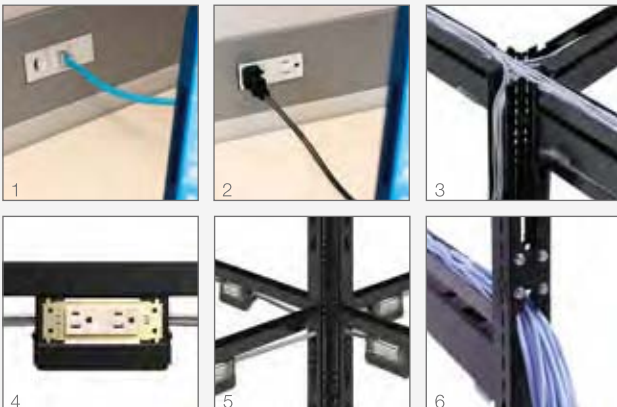

## Friendly Connections.

It's important you have the ability to connect with others, quickly and seamlessly. Sure, Answer's design will grab your attention. But Answer is friendly enough to give you what you need, and then stay out of the way for greater collaboration.

## Inside-out support for technology

Because access to information is critical to the modern knowledge worker, Answer® is designed from the inside out to support the intensive and changing use of technology. Easy access to cabling and flexible positioning of connection points enable your knowledge workers to access the tools and resources they need to be at their most innovative and productive.

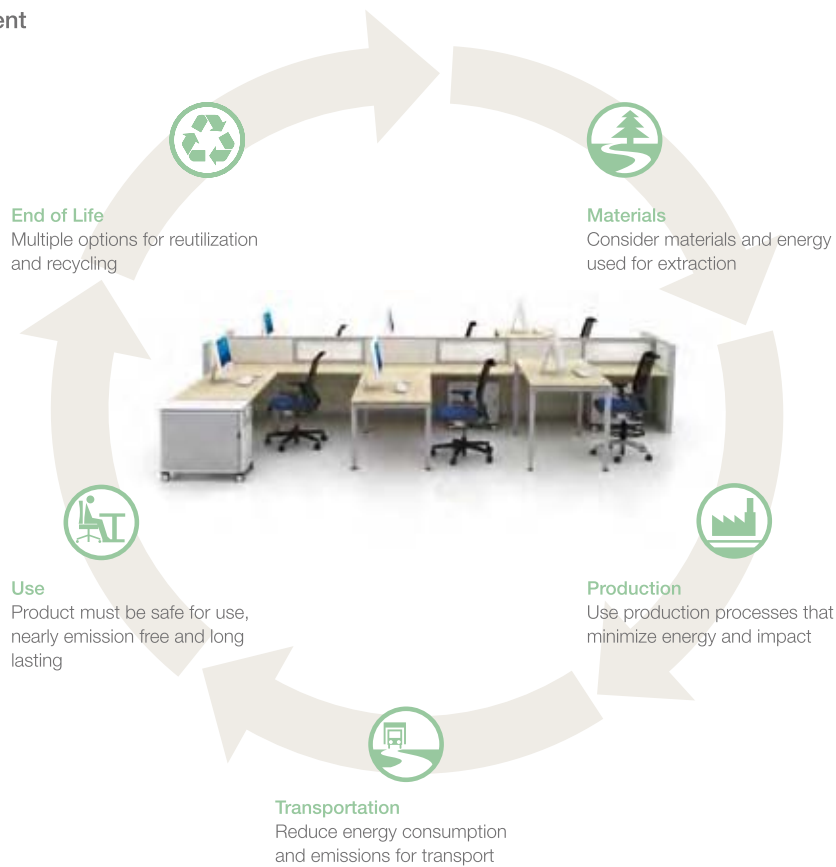

1. Data outlets can be located on skins every 314mm vertically (with technical package).
2. Power outlets can be located on skins every 314mm vertically (with technical package).
3. Optional top cap lay-in cabling simplifies changing panel heights and reduces network disruptions.
4. Outlets can be positioned at any point on cabling lines.
5. Openings accommodate horizontal routing through junctions.
6. Patented design eliminates disruptions to your network when stacking.

**Every stage of the Answer's life has been considered.** We worked with McDonough Braungart Design Chemistry (MBDC), selecting only materials that assessed safe for human and environmental health. Answer has undergone a complete Lifecycle Assessment, evaluating its lifelong impact on the environment — from materials extraction through production, shipping, use, and end of life.

Answer is available as a **Cradle to Cradle<sup>CM</sup> certified product.** Answer also has **Indoor Advantage<sup>TM</sup> certification** from Scientific Certification Systems as being a low emitting product, helping to contribute toward earning LEED credits for your project.
