PRESENTATION VS. COLLABORATION.

Meeting spaces today support leader-led presentations where information is controlled and shared by one person at a time, creating a “wait your turn” mentality. And when sharing information is necessary, it’s a hassle and many times interrupts effective collaboration.

media:scape® democratizes how people access and share information by allowing all participants to contribute ideas quickly and seamlessly. Suddenly, presentation shifts to collaboration, where everyone has an equal ability to engage and contribute, creating a richer meeting experience.

Meet media:scape. A solution designed specifically to connect people and their ideas.

People + Space + Information = Ideas

Today's workers need faster and easier access to each other and their information. media:scape merges furniture and technology to create more than just a setting. **It's a collaborative destination.** Different than workstations and conference rooms, media:scape allows teams to quickly access and share digital information with one another. The result? Meetings become **more inclusive**, allowing multiple participants to **contribute their ideas**, layer in real-time information and compare and assist in content creation and innovation. It's the strategic bringing together of people, space and information to help teams excel.

OPEN.CONNECT.
SHARE.

The media:scape PUCK™ enables users to seamlessly switch the information displayed on a laptop to a monitor or projector. It intuitively knows how many computers are connected at a given time. Designed for simplicity, users open the media well to retrieve a PUCK, connect the PUCK to their laptop and press the PUCK to instantly share their information.

- 1. Open** the media well and remove a PUCK
- 2. Connect** the PUCK to your laptop (the PUCK will turn white)
- 3. Share** what's on your laptop by pressing the PUCK (the PUCK will turn green)

Quick + Seamless = Collaboration

We've all been there, sitting in the conference room waiting for IT to arrive to help get the technology up and running. On average, the time lost per meeting due to people trying to manage technology to access and share information is anywhere from 5-10 minutes. With no software necessary, media:scape allows teams to get up and running quickly and seamlessly.

Simple to Use + Simple to Own

Collaboration happens everywhere. Sometimes you don't need a conference room. You need a supportive space where a team can get together and quickly bring each other up to speed. media:scape supports teams and enhances collaboration in open and closed environments and in a variety of postures. With one style number that includes furniture integrated with technology, ordering is easy.

Every stage of the media:scape product life has been restored.

We worked with McDonough Braungart Design Chemistry (MBDC), selecting only materials assessed safe for human and environmental health. The media:scape product solution is recyclable and is undergoing a complete Life Cycle Assessment*, evaluating the product's lifelong impact on the environment—from materials extraction through production, shipping, use and end of life.

* For complete information regarding recyclable content and Life Cycle Assessment **visit [steelcase.com](https://www.steelcase.com)**

Easy to plan, easy to own.

media:scape can be configured and reconfigured in a multitude of ways — in both the open plan and collaborative spaces — using a few simple components. The thoughtstarters that follow celebrate a range of applications, solving a variety of user needs.
